INVOLVED IN

ROAD CONSTRUCTION • FORESTRY • SITE PREP • UNDERGROUND CONSTRUCTION
DRILLING/FRACKING • OFF SHORE • COMMERCIAL DEVELOPMENT • EARTH MOVING

WHAT COULD YOU STAND TO LOSE IN A HEAVY EQUIPMENT FIRE?

- Vehicle Operator Injury
- Injury to Bystanders
- Increased Insurance Premiums
- Cargo Damage
- Environmental Damage
- Personal Injury Liability
- Equipment Damage
- Vehicle Downtime for Repair
- Loss of a Revenue Producing Vehicle
- Loss of an Irreplaceable Machine

THE NEED FOR AUTOMATIC FIRE PROTECTION

THE PROBLEM: In spite of modern safety features and conveniences, industrial, commercial, and municipal heavy equipment and machines are plagued with potential fire hazards. Therefore the danger of fire is constant. Since all vehicles carry a combination of highly combustible fluids including fuel, oil, grease, lubricants, hydraulic fluids, and ignition sources such as turbochargers, exhaust manifolds, electrical circuits, and batteries - fire can start quickly.

In the case of heavy equipment and machinery - the vehicles are working in remote locations where local or municipal emergency fire protection is unavailable. A portable extinguisher may be handy, but is often and mostly inadequate to the task of fire suppression on large earthmoving equipment and construction machinery.

COMMON FIRE HAZARD AREAS INCLUDE:

Engine Compartment • Electrical Cabinet • Coolant Heater Compartment • Particulate Trap Area
Cargo Area • Generator Area • Refrigeration Unit • AC Condenser • Hydraulic Pump • Battery Box

THE SOLUTION: Jomarr Products, Inc. specializes in automatic vehicle fire suppression protection. Whether OEM factory installed, vehicle dealer installed, or fleet retrofit, an Jomarr Heavy Equipment Fire Suppression System is designed provide many years of 24 hour automatic fire protection.
