THE NEED FOR AUTOMATIC FIRE PROTECTION

The modern sanitation truck vehicle –

Front Loader – Rear Loader - Side Loader (ASL) –
Grapple – Pneumatic Collector - OTR Trash Hauler

... with required Emission Control Systems
... with costly ancillary electronics such as GPS and AVL Tracking Systems
... with heavy duty hydraulic systems and equipment
... whether Diesel, CNG, LNG, Bio-Fuel, Hybrid, or Fuel Cell Powered
... a major capital investment!

Jomarr Vehicle Fire Suppression Systems are designed to protect various hazardous areas where fires start and spread quickly. These areas include:

Vehicle Engine Compartment – Coolant Heater Compartment –
Battery Boxes - Hydraulic Areas – Electrical Cabinets – Ancillary Engine
Compartment - Particulate Trap Areas – Generator Area –

... Wherever Potential Fire Hazard Exists.
